UNEQUAL EXCHANGE

Developing countries lose billions of dollars every year due to illicit financial flows or IFFs. One of the big obstacles countries face in curbing IFFs is the access to information, especially from developed countries that happen to be tax havens. Automatic exchange of information allows countries to gauge the magnitude of illicit finance that has crossed borders. The webinar aims to demystify this issue, analyse its loopholes and its relevance from the perspective of developing countries.

Presentation by: Andres Knobel, Tax Justice Network

Time: 11:00 UTC - 12:00 UTC
Date: August 29th, 2018
